

The Natural Choice for Lowering Risk of Serious Diseases!

OLIVIE PLUS 30x

All natural and certified organic unique oil that is exceptionally rich in polyphenols.

*Olive oil polyphenols are associated with **cholesterol and blood pressure lowering effects.***

When the body can't clear cholesterol from the bloodstream, it can deposit along artery walls, and they become stiff and narrow. The heart now has to work overtime to pump blood through them, causing blood pressure to go up.

Olive oil polyphenols have been shown to improve overall cholesterol levels by reducing LDL-C ('bad' cholesterol) and improving HDL-C ('good' cholesterol).

Furthermore, it can effectively fight free radicals that cause LDL-C to become oxidized and which then can lead to atherosclerosis.
