

AN ESSENTIAL MINERAL

Iron is essential for production of **haemoglobin**, the protein in red blood cells that carries oxygen around the body. Symptoms of low iron include:

- ✓ PALE SKIN
- ✓ FATIGUE
- ✓ WEAKNESS
- ✓ IRRITABILITY
- ✓ SHORTNESS OF BREATH
- ✓ BRITTLE NAILS
- ✓ HEADACHE
- ✓ DECREASED APPETITE

Iron deficiency is one of the **most common mineral deficiencies** worldwide.

The groups at **highest risk** of iron deficiency are:

- ✓ WOMEN OF CHILDBEARING AGE
- ✓ PREGNANT WOMEN
- ✓ LACTATING WOMEN
- ✓ BABIES
- ✓ CHILDREN
- ✓ ADOLESCENTS

FORTIFERRUM®

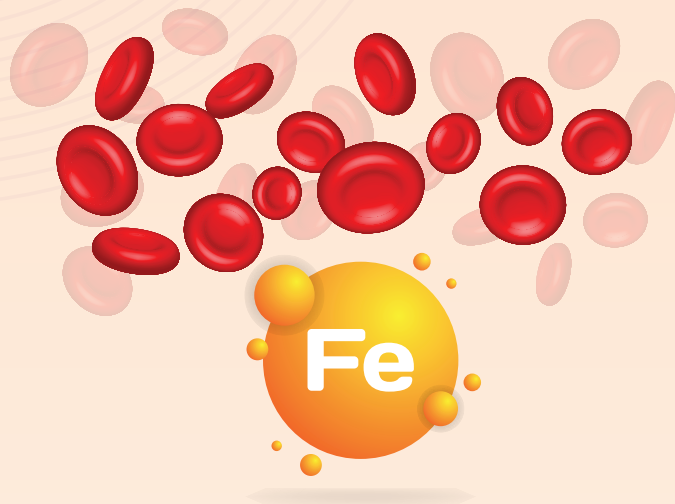

...for an iron health

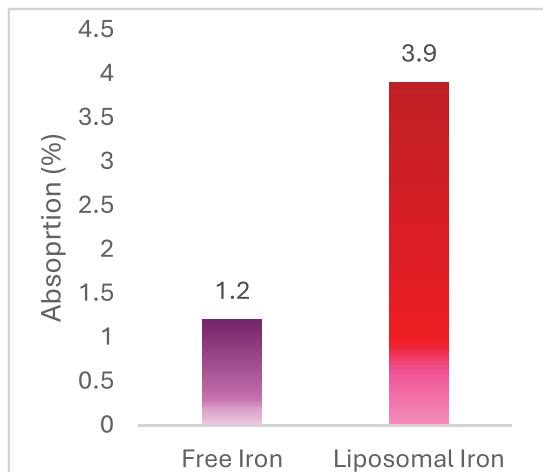

IRON SUPPLEMENTS

can help with deficiency
but they aren't perfect.

Iron doesn't dissolve easily in water, so your body can struggle to absorb it efficiently, leading to stomach discomfort or constipation, the most common reasons people stop taking iron supplements.

Modern liposomal encapsulation improves the absorption of iron, with better gastric tolerance due to its innovative release system.

FORTIFERRUM®

SOLVES THE COMMON PROBLEMS OF IRON
SUPPLEMENTATION WITH AN INNOVATIVE FORMULA!

It features a state-of-the-art liposomal form of iron pyrophosphate **SUNACTIVE®** shown to have high bioavailability thanks to its microencapsulated design, and is gentle on the stomach with reduced nausea, constipation, and metallic taste.

The only **Iron Supplement** with:

- + High bioavailability and optimal absorption
- + Limited gastric side effects
- + Vitamin C to optimize iron absorption and soluble fibre to help to mitigate constipation
- + A delicious strawberry-flavoured powder in easy, single-use sachets, no more rusty taste!
- + Versatile and convenient form for kids and adults - can be taken straight from the pack or mixed with water or juice
